MARLEX STREET ELLS

Description

A male threaded X female threaded street elbow fitting typically incorporated in connection from lateral to sprinkler to provide adjustment of sprinkler head to desired height and vertical orientation when incorporating two or more fittings. Provides protection to lateral piping when sprinkler is run over by lawn mower, cars, etc.

Features

- Manufactured of a self lubricating material, semi flexible material
- 30% more tapered threads than others to accommodate standard variance found in industry threaded components
- When used in pairs or triplicate, marlex street ells provide stability to support sprinkler head during installation and enough flexibility when backfilling to fine adjust the sprinkler head to desired grade level and vertical orientation.
